Front End Developer

As a Master's Degree student in Computer Science, I'm eager to pivot into front-end web development. Despite lacking direct experience, my enthusiasm for technology and relentless drive to learn make me a motivated candidate. I thrive in dynamic environments and am ready to tackle new challenges head-on. Excited to contribute and grow in this ever-evolving field.

EDUCATION

Bachelor in Computer Science/Information Technology

Azerbaijan Technical University • Baku, Azerbaijan • (GPA: 4.5) • 09/2018 — 07/2022

Master in Computer Science/Data Science

WSB University • Dąbrowa Górnicza, Poland • (GPA: 4) • 10/2022 — 07/2024

SKILLS

Programming Languages HTML, CSS, JAVASCRIPT, SQL, SASS

Libraries/Frameworks Bootstrap, Tailwind, JQuery, React

Tools/Platforms REDUX TOOLKIT, FIREBASE, REGEX

Soft Skills Problem Solving, Communication Skills, Attention to Detail, Time Management, Adaptability, Collaboration Skills, Willingness To Learn

Languages Azerbaijani - Native, Turkish - C1, English - B2, Polish - A2

PROJECTS

Resido - Residence Real Estate • [Link](#)

- I designed and developed Resido, a sleek real estate website, utilizing HTML, CSS, and JavaScript to create a modern, user-friendly interface. I implemented JQuery for intuitive functionality and harnessed the power of SASS for streamlined styling, resulting in a visually stunning platform tailored for seamless property browsing.

Twitter Clone • [Link](#)

- I personally built a Twitter clone using React and Tailwind CSS, showcasing my proficiency in frontend development. With React's component-based architecture and Tailwind's utility-first CSS, I created a visually appealing and responsive platform, ensuring a seamless user experience from start to finish. And also, I implemented a 'Customize your view' feature allowing users to adjust background colors, font sizes, and color schemes within the site, fulfilling specific user requests.

Spotify Clone • [Link](#)

- I constructed a Spotify clone with React and Tailwind CSS, incorporating React Router for smooth navigation, React-Range configuration for intuitive controls, and 'useAudio' from 'react-use' for enhanced audio functionality.

Getir.com Delivery Services (In Progress) • [Link](#)

- I'm currently in the process of building Getir.com, an on-demand delivery service for grocery items and restaurant food deliveries, utilizing React and Tailwind CSS. In upcoming phases, I plan to enhance the project by refining its responsive design and integrating additional features such as mobile app support and payment card information components.
